

# CSS 324 – Intro to ML

Machine Learning Projects

# Project Requirements

- Data
- ML algorithms
- Application
- Documentation

# Data

- Data need to be collected by a student
  - Scrap website (KZ)
  - Collect from other students
  - Inquiry from some KZ company

# Application of ML algorithms

- Student need to be able to use ML algorithm in real life projects
- Steps need to be clear: Preprocessing, Training, Validation, Tuning

# Application

- Project need to have some app:
  - Desktop
  - Mobile
  - Web

# Documentation

- At least 5 pages documentation which describes the implemented project

# Extra points

- 5pts extra if you publish your work at SDU Vestnik
- 5pts extra if you add Deep Neural Networks (need to be able to explain)
